

BioPremium

ETHANOL

**Ethanol from controlled biological cultivation
... from now on available!**

In the food industry, in the pharmaceutical and cosmetics industries BioPremium Alcohol gains an increasing importance.

Organic Ethanol from controlled biological cultivation is fermented from separate wheat plantations of very high quality and distilled and rectified gently.

The result is a premium product which fulfills strict requirements during the entire value creation.

We deliver our undenatured 96% BioPremium Alcohol in tank trucks, in 1000 liter containers, in 200 liter drums or in 20 liter drums.

Our Service

- Batch related certificate of analysis
- Transparency and traceability
- Application of certified containers
- Prompt deliveries
- As desired USDA-NOP Certification (National Organic Program).

Further information can be found on www.brueggemann.com/startseite.

The criteria of the EC Eco-Regulation:

- Renunciation of plant protection with chemical-synthetic substances
- Renunciation of readily soluble, mineral fertilizers
- Prohibition of the use of genetically modified organisms
- Prohibition of irradiation of eco-food

Bio-Certification

Based on the new EC regulation 834/2007 and the National Organic Programme USDA-NOP our company was successfully audited.

The obtained certificates report the conformity with the Eco-regulations of the USDA-NOP and the European Community (EC) and ensure transparency from the producer to the customer.

Organic Ethanol from controlled biological cultivation

EC Nr. 834/2007
USDA-NOP CZ/NO 03954
