

Ethanol NQ

... an especially economic alternative!

Ethanol NQ was especially designed for applications which do not necessarily require premium ethanol grades, e.g. for applications where the primary focus is on the commercial side.

Our Ethanol NQ is for instance used in the coatings industry, as dissolvent and antifreeze agents as well as methylated spirit.

We, BrüggemannAlcohol Heilbronn GMBH, ensure that our Ethanol NQ is marketed competitively, giving you all advantages in these markets.

Our service

- Batch-related Certificates of Analysis
- Traceability
- Use of inspected containers
- Quick delivery
- Available in azeotropic and waterfree grades

Ethanol NQ is delivered to you in tank cars or in 1000 liters containers. Also with our Ethanol NQ you can rely on our excellent logistics expertise ensuring timely deliveries according to your needs.
