

# PrimaSprit

ETHANOL

... High quality, versatile applications

PrimaSprit respectively "Potable Alcohol" or „Neutral Alcohol“ is often used in the spirits and food industry – be it in the production of aromas, diverse spirituous beverages (such as vodka, gin, liqueurs, bitters, aperitifs) or desserts, filled pralines as well as for the preservation of foods.

PrimaSprit convinces by its analytic purity and sensory neutrality. This high-quality substance is obtained from sugar beets molasses, corn or fruit.

We deliver our undenatured 96% Vol. Potable Alcohol in tank cars, in 1000 liter containers or in 200 liter drums.

### Our service

## Potable Alcohol

### High quality requirements

Quality demands which are not measurable in the laboratory are often made regarding ethanol for spirituous beverages.

In contrast to distillates from agricultural raw materials which still show the sensory characteristics of these, ethanol for spirituous beverages has to be tasteless and odorless.

In order to meet these demands our alcohols are sensorially analyzed on a regular basis. This analysis is carried out by especially trained employees of our company.

Generally, this so called „neutral alcohol“ has an alcohol level of 96% Vol. to 96,4% Vol.
