

New ZnO PRO Series in rubber vulcanization

As a specialist for zinc-based rubber additives, Brüggemann developed the new **ZnO PRO Series** to meet the specific demands on performance, price and ecology in rubber vulcanization.

Performance

- High crosslinking density
- Consistent mechanical properties
- Optimized processibility

Price

- Best price/performance ratio
- Cost savings

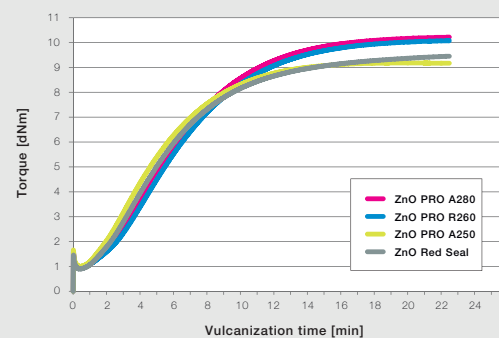

Ecology

- Sustainability
- Low heavy metal content
- Green rubber

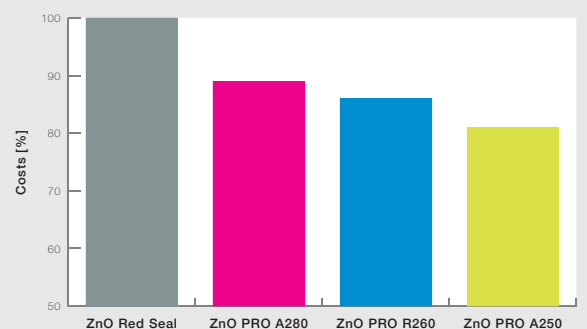

Rubber mixture

Ingredient	Dosage [phr]
SBR	100
N330	40
Paraffinic oil	20
Stearinic acid	2
Sulfur	2.5
CBS	0.65
Zinc compound	3
Dispersing agent	2
